## **Release #1 (10:19) BAF Identified in Death Valley**

(INDY) 14 Nov – Beak and Feather (BAF) has been confirmed in Death Valley in a backyard poultry flock. More details will be made public as they become available. The State Emergency Management Operations Center for the state has been activated.

A Joint Information Center has been activated to handle media and public inquiries. The contact is 317–238-1716.

A stop movement rule has been ordered by the State Veterinarian. This applies to all poultry and poultry products (such as feathers and manure) in Death Valley County.
